CHIMINAL STATISTICS. - Dr. Jarvis, of catanal Statistics. Dr. Jarvis, of juston, has published some interesting justs in relation to the crimes of the sates in this country and England. He sates that the crimes of male offenders in the property of the country and constitutions of the country and the country are constituted in the country of t age mostly against person and property, n which the aggressors intended to grat-ic or benefit thumselves at the expense of others. On the other hand more than three-fourths of the offenses of females reagainst their own health, peace and merest crimes of sensuality, as the actor termed them, which require no ad of the intellect, no plan, no purpose, so reason. Hence he says that the sines of men are notice for the says that the gmes of men are mainly crimes of selfshness, while those of women are crimes self-sacrifice. Women, he asserts, reas their offenses more frequently than seris, re-ject their offenses more frequently than seri; 100 maies went to prison 180 times, and 100 females were imprisoned 346 sees. The offenses of males are of a er nature and more injurious to soci-while the greater majority of female ses are comparatively harmless to the doctor said, however, that ecting the offenses of intemperance and ensuality the male offenders outnumber the females, but society is far more lenent and forgiving to the sinning man

THERE is a possibility that electricity still take the place of rennet, and work is sell. Authorities say that electricity still coagulate milk even faster than rensel, and a cheesemaker, who claims to have sued it for the purpose of cheese manufacture, says he has found the curd made by it to cure into fine flavored cese. He reports it as having extra-dinary efficiency in reducing the curd of skim poilk into salvy, rich appearing cheese, but it did not restore the flavor that was lost by the removal of the cream. It was said to have just the favor which the milk in its skimmed or askimmed condition would produce.

THAT was a happy thought of the Department which guards against improper assort the postal cards. The carriers are not to read what is on the cards, miss it is sourcilous! It will be seen that this is a perfect security against the ed in Ireland.
